EXPERIENCE

VoiceQube, — *Software Engineer*

JULY 2023 - PRESENT

- Developed web applications for clients, ensuring high-quality, scalable, and efficient solutions.
- Currently building a recruitment portal using the MERN stack (MongoDB, Express, React, NodeJS).
- Collaborated with cross-functional teams to gather requirements, design architecture, and implement features.
- Conducted code reviews, testing, and debugging to maintain code quality and functionality.
- Provided technical support and maintenance for existing applications.

PROJECTS

Meetdule — *MERN Stack*

Meetdule is a scheduling application that streamlines the process of finding and managing meeting times. It allows users to schedule and manage meetings effortlessly in one convenient location.

Roles & Responsibilities:

- Designed and built different modules of application from scratch such as Events, Meetings, User Authentication, etc.
- Integrated Google Calendar to enable users to easily check availability and have meetings automatically saved in their calendar.
- Integrated email functionality for various purposes such as sending welcome emails, password recovery, and new event notifications.
- Designed Database Schema for the App.

Product catalogue System — *Node, Express, MongoDB*

This helps business owners to manage various details about the inventory products like quantity, price, different approvals, etc.

Developed the backend of the system using Node.js with Express framework, leveraging MongoDB as the database to manage and store inventory product details effectively.

SKILLS

Programming Languages
Javascript ES5, ES6, HTML, CSS

Libraries & Frameworks
React JS, Node JS, Express, Material UI, Redux, Mongoose

Database
MongoDB

Tools & Platforms
Git, GitHub, VS Code, Postman

EDUCATION

IRM, Jaipur
MBA/PGDM (2019 - 2021)

INTERESTS

Music, Badminton, Crafting
